Tech Tips – Showing the Log

- Did you know that there is an easy way to see syntax in your output?
- Users can copy this syntax into a syntax file to automate their work.

Tech Tips – Showing the Log

- Go to the **Edit** menu and select **Options**. Click on the **Viewer** tab.
- Down the left-hand side are icons that represent output items. The first item is the Log. To show syntax in the output select Shown. Also, tick Display commands in the log at the bottom of the window. When output is run, the syntax for each procedure will appear above the output. Users can copy the output to a syntax file to save and automate their work. It's that easy!
